

# C3 Anti-Corrosion System

C3 Anti-Corrosion System refers to a protection rating for medium corrosive environments, primarily used for steel structures in urban, general industrial, and light-polluted areas. It is applied to steel structures in urban buildings, railings, curtain walls, industrial plants, equipment and pipe supports, etc.

## Selected Projects

Gymnasium in Macau

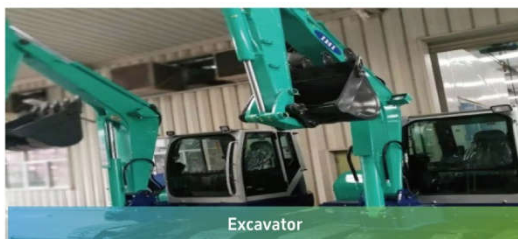

ABC Hotel

Sanitary truck

Container

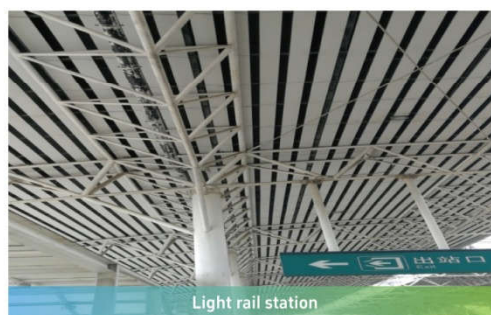

Excavator

Heavy duty truck

Amusement park ride

Light rail station

# C3 Anti-Corrosion System

Product	Film thickness (μm)
Epoxy Primer	60-100
Acrylic topcoat or Acrylic polyurethane topcoat	50-80

## ■ Features

- Ideal for urban, industrial, and mild marine environments; a cost-effective option.
- Excellent resistance to weathering, salt spray, and chemicals.
- Easy to apply with versatile compatibility.
- Effectively blocking moisture, weak acids, and alkalis to minimize maintenance costs.

## ■ Founded in 1965 with three Class-A production bases

Headquarters

Zhuxi Chemical Park

Sichuan

## ■ Certifications

ISO 9001:2015  
ISO 14001:2015  
ISO 45001:2018  
IATF 16949:2016  
EcoVadis Bronze
